Lab-Assessment _01: Functions

REG NO 25MEI10107

NAME AKSHARA K BHASKAR

SOURCE CODE

```
#include <iostream>
using namespace std;

// a) Function with parameter and return value
int add(int a, int b)
{
    return a + b;
}

// b) Function with parameter and no return value
void displayCube(int num)
{
    cout << "Cube of " << num << " is: " << num * num * num << endl;
}

// c) Function without parameter but with return value
int getNumber()
{
    int x;
    cout << "Enter a number: ";
    cin >> x;
    return x;
}
```

```
// d) Function without parameter and without return value
void greet()
{
    cout << "Welcome! This function has no parameter and no return value." << endl;
}

int main()
{
    int num1, num2, result;

    cout << "Enter first number for addition: ";
    cin >> num1;

    cout << "Enter second number for addition: ";
    cin >> num2;

    // a) Calling function with parameter and return
    result = add(num1, num2);
    cout << "Sum is: " << result << endl;

    // b) Calling function with parameter and no return
    int number;
    cout << "Enter a number to find cube: ";
    cin >> number;
    displayCube(number);
```

```
    // c) Calling function without parameter but with return
    int value = getNumber();
    cout << "You entered: " << value << endl;

    // d) Calling function without parameter and without return
    greet();

    return 0;
}
```
